

**This brief tutorial will guide you through the steps required to add PDF files to iBooks on your iPad, iPhone or iPod Touch, using Dropbox.**

Dropbox is a fantastic service that allows you to store files (2GB for free, or \$9.99 per month / \$99.00 per year for 50GB) online. It also syncs those files across all of the computers you own that have the Dropbox software installed, and, you can access all of your stored files via a web browser on any computer. For more info on the Dropbox service, see their overview or [sign up here](#).

After you've signed up for Dropbox, you'll need to install the Dropbox app on your iPad/iPhone/iPod Touch. It's free, and can be found in the iTunes Store [here](#).

Lets get started. Add a PDF file (or several) to your Dropbox account. Once the PDF has been uploaded, open up the Dropbox app on your iPad (iPhone, iPod Touch...).

Tap the "Dropbox" button in the very upper-left corner of the app. Navigate through your Dropbox folders to locate the PDF file that you want to add to iBooks. Select it by tapping it once.

Depending on the size of the PDF (and your current Internet connection speed) it may take a while for the PDF to load.

Once it has loaded, tap the "Open with" button on the very upper right corner of the Dropbox app.

click to enlarge

Select iBooks from whatever may be listed (will vary depending on which apps you have installed).

Your PDF is now saved in iBooks and will be available for you to read any time you want :)
