How to Crop Photos on an iPad With the Photos App

Whether you want to cut out blank sections from your photos or remove somebody who photo bombed your family portrait, you can concentrate the focus of an image on the most important parts with the Crop tool found in the iPad's Photos app.

Steps

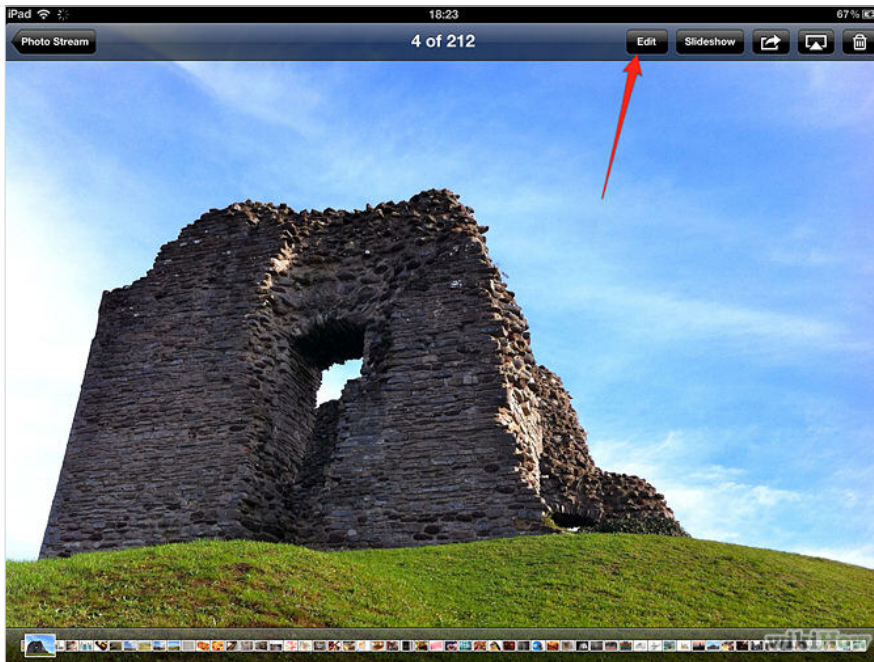

- 1 Tap the Photos icon on your iPad's Home screen to launch the Photos app.

2 Select the photo you want to **edit** and tap the Edit button.

3 Tap the **Crop** button.

4 Drag the edges of the grid that appears to select the crop area. Now tap the Crop button to crop your image.

5 Tap the Save button.

Tips

- You can also tap the “Constrain” button to pick from a selection of preset crops for your photo including standard dimensions such as 16x9 and 4x3.
- To straighten your image while cropping, place two fingers on the iPad’s screen and rotate them in a clockwise or anti-clockwise direction.
