How to Lock iPad Screen Orientation

With the release of iOS 4.2, the physical switch which allowed you to freeze the iPad's screen orientation was turned into a less useful mute button. Fortunately, it is possible to lock your screen's rotation using a few easy clicks.

Steps

- 1** From any iPad screen or application, double click on the big home button on the bottom of the iPad.

Can't Decide Between a Tablet and a Laptop? You Don't Have To.

2 Swipe the bottom menu that appeared after you double clicked the home menu to the left.

3 Touch the screen orientation lock button on the bottom left, which you uncovered by swiping left above.

4 Notice the button changes to lock after you have switched it.

Tips

- This works in portrait or landscape orientation.
- For iOS 3.2 users, simply slide the **switch** down to lock the orientation. The switch is now called the Mute button on iOS 4.2.
