How to Open Email Attachments on an iPad

Find the right app to open files sent to your iPad via email, using the Mail app.

Steps

- 1 Open the email containing the attachment.

- 2 Tap and hold the icon until a menu appears. Tap one of the suggested apps to open the file with or tap Open In... for more options.

3 Tap the name of one of the apps listed on the menu that appears.

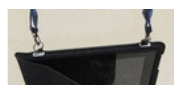

Tips

- If no apps are suggested for your attachment, you may need to [download](#) additional software to open the file.
- Some files can be opened in the iPad's built-in Quick Look feature, in which case you can tap the app's icon to [preview](#) it.

Warnings

- Some apps might not be able to open particular file type but may still be suggested. If this is the case, try another suggested app or download a suitable app from the App Store.
