

How to Transfer Data Between Two Ipad Using Appandora

How to transfer your favorite songs, apps, movie, ebooks and lots of other useful data from one iPad to another iPad. Here we will offer you an easy way to transfer data between two iPads by using Appandora iPad Transfer.

Steps

- 1 Appandora Installation.** Download and install Appandora iPad Transfer from <http://appandora.com/download.html> on your computer.

Download Phone Transfer 

phone-transfer.wondershare.net

Transfer Phone Data to Phone/PC/Mac Music/Contacts/SMS/Photo/Video etc.

- 2 Connect the first iPad to PC.** Plug the first iPad into your PC with USB cable, then open Appandora iPad Transfer.

- 3 Transfer the first iPad Files to PC.** Choose either file type like Media, Photos, Apps or else under iPad. Press "Shift" and select all files listed on the panel, then click "Export" and choose [backup](#) location in your PC. Click "OK" to backup files from the first iPad to your own PC. Wait till the needed backup completed then disconnect the first iPad.

- 4 Connect the second iPad to PC.** Plug your second iPad into PC. Go to correspondent file type. Click "Import" to browse to the exact location where you store the first iPad files. Press "Shift" and select all files, then click "Open".
