Nexus 7 from \$229

www.google.com/nexus

The 7" tablet from Google. Free shipping for limited time. Buy now.

There are the lower mid-range tablets and upper mid-range tablets. Tablets with these price points are more suitable to production environments. You would use these tablets for school or for work. The feature sets are more robust, the processors and chipsets are faster and of a better quality. The mid-range priced tablets offer much more than the budget tablets and usually, the extra cost is completely justified.

Mid-range tablets also generally look better than their budget counterparts do. They are made of tougher materials and offer an overall better user experience. The resolutions of the screens offer a better picture, the software offers much more responsiveness and there are more options in tablet size to choose from.

Mid-range tablets are also closely related to the high-end tablet market. Many of today's mid-range models were yesterday's high-end models. Therefore, this category of tablet offers the widest range of choice. If you start with a mid-range tablet, you will definitely get what you pay for. Most of the best-rated tablets are in this category.
